It is a fully functional CNC Simulator for your computer. All functionality may or may not be supported by your operating system. This program is intended for use with true CNC machines. You must acquire a CAD Plus CAM license from KOMPOSITE, inc. before purchasing this product. Open your serial monitor (for example, you can use a USB Serial adapter for this purpose). If you wish to enable SD card uploads, then check the box below: Once the serial monitor is open, open your CNC (which should be configured to communicate via USB serial) and send the following: Build mode: 0 Work mode: 0 + Z: 0 - Z: 0 Do not load any slicing software at this time. Now attach the SD card and upload the firmware file into the SD card using your file system. Once that is complete, close the CNC and reopen the serial monitor. You can then try the following commands in serial: Build mode: 2 Work mode: 2 + Z: 2 - Z: 2 Note: It is not recommended to load any other libraries or software until you've confirmed with KOMPOSITE, inc. that the above is working. Before sending any other commands, stop the serial monitor by pressing Ctrl-Z. Now close the serial monitor and send the following to enable first layer: Layer: 0 Lat: 0 Lon: 0 Val: 0 This command will enable the first layer of cuts. If you receive a "Protected settings......" error, then you must first attach the SD card and upload the firmware file before sending this command. This can be done by sending the Build mode: 0, Work mode: 0, + Z: 0, - Z: 0, and loading the firmware. If you receive an error saying "CNC is not a supported file format, can not use Layer." then you have an unsupported

How can I do that? I can not find the conclusion of "..go all the way up to the highest..WY-5039 should be the figure of the next level". A: The Main loop of the program is in its default position, and they don't go up. It is probably because you are operating with integers not with double, so: Main loop is: for(i=0;i<n;i++) { ... } Blogroll Don't Choose This Company Without Reading This.. Posted by Andrew on Mar 05, 2012 If you've ever played Dress Up, chances are you know what I mean. You see the outfits on a rack in the back of the store, all pretty and shiny looking. The salesperson is all confident and enthusiastic and you can see that this is a one-of-a-kind, custom-made, made-just-for-you job. You make your choice, the salesperson picks out a few colors and accessories. You go home, and just like magic, the outfit is there when you open the door. It's the perfect outfit to wear to your next party, or to work, or to play at the park, or to just wear around the house...even if you are wearing it out of the house, it looks amazing. But when I tell you the story of how we created our custom made to order home decor, I'm not telling you the whole story. It's not a lucky guess. It's not a sound bite on a sales call. It's not a corporate news story. It's the whole story, as told to me by the people who made it happen. We have a friend that commissioned a custom made Christmas tree for their home. They saw the tree, they had ideas about decorating it themselves and they went to a local decorator and found the perfect one. The decorator worked on it for a month, carefully selecting just the right ornaments, adding personal touches, designing this 50b96ab0b6
